---

Randy, during our phone conversation earlier this week regarding Texas International Box and the many FOIA's the EPA has received, you offered to send me a copy of all the manifests in the possession of the PRP group. After talking to Ed Quinones about your offer, we have come to the decision that such an offer could greatly enhance our ability to more fully respond to the FOIA requests. Would it still be possible for you to provide an electronic version of all the manifests that the PRP group has located? If so, when do you think this could become available to the EPA?
